DETAILED ACTION

Response to Arguments

Applicant's arguments, filed 10/29/2008, with respect to claims 1-17 and 19-29 have been fully considered and are persuasive. The rejection of claims 1-17 and 19-29 has been withdrawn.

With regards to claim 30, applicant's arguments do not comply with 37 CFR 1.111(c) because they do not clearly point out the patentable novelty which he or she thinks the claims present in view of the state of the art disclosed by the references cited or the objections made. Further, they do not show how the amendments avoid such references or objections.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later

Art Unit: 2884

invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claim 30 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ciesla et al. (*Ciesla*, GB 2352512) in view of Arnone et al. (*Arnone*, US 2003/0178584).

With regards to claim 3, Ciesla fails to teach said emitter and detectors are photoconductive devices. Arnone teaches a THz imaging device comprising photoconductive emitter and detectors. It would have been obvious to one with ordinary skill in the art at the time the invention was made to modify Ciesla with Arnone in order to provide higher penetration depths.

Allowable Subject Matter

Claims 1-17 and 19-29 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

With regards to claim 1, the reasons for allowance have been indicated in the Office Action mailed on 5/29/2008.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 2884

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
